

Openweathermap:

The screenshot shows the Openweathermap API keys management interface. At the top, there's a navigation bar with links like Guide, API, Dashboard, Marketplace, Pricing, Maps, Our Initiatives, Partners, Blog, For Business, and Support. A search bar says "Weather in your city". Below the navigation is a green "Notice" box stating "API key was created successfully". The main content area has tabs for New Products, Services, API keys (which is selected), Billing plans, Payments, Block logs, My orders, My profile, and Ask a question. A note below the tabs says "You can generate as many API keys as needed for your subscription. We accumulate the total load from all of them." Below this is a table showing two API keys:

Key	Name	Status	Actions	Create key
e19dacf5305a7457b33134bafe13d55c	Default	Active	<input checked="" type="radio"/> <input type="checkbox"/> <input type="button" value="x"/>	<input type="text" value="API key name"/> <input type="button" value="Generate"/>
07f0c1be9f78bb3ba31139708353ef2c	IBM	Active	<input checked="" type="radio"/> <input type="checkbox"/> <input type="button" value="x"/>	

At the bottom of the page, there are sections for Product Collections (Current and Forecast APIs, Historical Weather Data, Weather Maps), Subscription (How to start, Pricing, Subscribe for free, FAQ), and Company (a brief description of Openweathermap).
